DETAILED ACTION

Claim Objections

1. Claims 1, 3, 4, 6, 7, and 15 are objected to because of the following informalities:

Claim 1, lines 11, 16, and 21, it is suggested to replace "said transmission network" with --said transmission networks--. Line 16, "adapter for" is not positively recited limitation, it is suggested to delete "adapted" from the claim.

Claim 3, line 4, it is suggested to insert --forward relay line-- before "fault notification".

Claim 4, line 4, it is suggested to replace "said client line" with --said client lines--. In lines 4, 14, 18, 20, and 25, it is suggested to replace "said transmission network" with --said transmission networks--. Line 7, it is suggested to replace "said Ethernet network" with --said Ethernet networks--. Line 18, "adapter for" is not positively recited limitation, it is suggested to delete "adapted" from the claim. It is suggested to insert --the-- before "Ethernet" in line 21 and before "client terminals" in line 22.

Claim 6, line 4, it is suggested to insert --forward relay line-- before "fault notification".

Claim 7, line 14, it is suggested to insert --of a plurality of Ethernet paths-- after "Ethernet path".

Claim 15, line 4, it is suggested to insert --forward relay line-- before "fault notification".

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2616

3. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 13 recites the limitation “the fault”. It is unclear which one of the faults mentioned in lines 10 and 11 the applicant is referring to. Line 18, “said respective capsules” and “the received frame” lack antecedent basis.

Claim 4, line 15 recites the limitation “the fault”. It is unclear which one of the faults mentioned in lines 12 and 14 the applicant is referring to. Line 21, “said respective capsules” lacks antecedent basis.

Claim 7, line 9 recites the limitation “said fault”. It is unclear which one of the faults mentioned in lines 6 and 7 the applicant is referring to. In lines 20 and 22 recite the limitation “each line”. It is unclear what lines the applicant is referring to.

Claim 10, lines 5 and 8, “each line” is unclear. Line 8, “said transmission-related K1 byte and K2 byte” lacks antecedent basis.

Claim 12, “said transmission-related K1 byte and K2 byte” in line 14, “said active route” in line 16, and “said spare route” in line 17 lack antecedent basis.

Claim 13, line 23 recites the limitation “said fault”. It is unclear which one of the faults mentioned in lines 20 and 21 the applicant is referring to.

Claim 16, line 7 recites the limitation “said fault”. It is unclear which one of the faults mentioned in lines 4 and 6 the applicant is referring to.

Allowable Subject Matter

Art Unit: 2616

4. Claims 1-16 would be allowable if rewritten or amended to overcome the objection(s) and/or the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

5. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or suggest generating a capsule comprised of each of the fixed-length frames, a type field for notifying a fault occurring on one of the client lines, a forward relay line fault notification field for notifying a fault occurring in the transmission networks in a forward direction, and a backward relay line fault notification field for notifying the fault in a backward direction.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

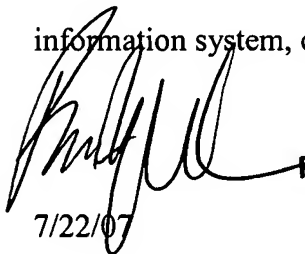

Agrawal et al (2001/0038471), Collins et al (7,190,666), Uzun (7,142,504), and Kakizaki et al (6,975,811).
